

King Saud University, Riyadh, Saudi Arabia

Founded in 1957, King Saud University (KSU) is Saudi Arabia's premier University, and one of the top tertiary institutions in the region.

In the recent past KSU brought in significant reforms with the mission that its research and academic activities should be visible internationally and contribute to the University's world recognition. KSU is implementing a well structured visionary and pragmatic plan to make the university a global research Institute. To this end, the University has recruited and acquired the inputs of international researchers who are specialist in various research fields with outstanding careers as part of Distinguished Scientist Fellowship Program (DSFP). Under this programme Nobel Laureates and world recognized academicians are being appointed as Visiting Faculty and Adjunct Professors to lead top notch research in all fields of Science and Technology.

Prof Chandrasekharam has been appointed as an Adjunct Professor under DSFP to establish geothermal energy resources programme in KSU
